High school student racing to success with Blueprint Education

February 1, 2007, Phoenix, Ariz.—Sixteen-year-old Victor Pfluger is a dynamic example of how Blueprint Education helps students succeed.

Pfluger was the youngest driver in history to win an ASA Speed Truck Race and was a 2003 SWKA Kart Champion. He also was the national and regional ProAutoSports in MSR class champion in 2004. He recently finished fourth for the season in the Parker Farms/Mondello Tech/LaHorgue Race Cars Speed Truck Series becoming the youngest driver to finish the season top five in points. In 2007, he expects to compete in the prestigious NASCAR AutoZone West Series.

Victor's drive and determination for racing also carries over into other aspects of his life. Although much of his time is taken up by practices and competitions, Victor is still on track to graduate two years early. He skipped 8th grade and with the help of distance learning courses through Blueprint Education, he will finish high school two years ahead of his peers.

Not only has Pfluger kept up with his class, he's also maintained a spot on the honor roll throughout his entire academic career. He remains focused on his education even as he competes in races, and Blueprint Education's fully accredited courses are helping him achieve his goals. Ultimately, Pfluger aspires to be both an automotive engineer and a professional racecar driver.

ABOUT BLUEPRINT EDUCATION

Blueprint Education is a non-profit organization that has been helping students succeed since 1969. Services offered by Blueprint Education include distance learning, curriculum design, and alternative education. Blueprint Education's programs and courses meet the high quality standards of the NCA Commission on Accreditation and School Improvement, CITA, and the NCAA.
